Allowable Subject Matter

The restriction requirement is withdrawn by the examiner.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Dunn et al. teaches a junction circulator including terminals on the bottom of the ferrite.

Yoneda teaches a nonreciprocal device having a mounting substrate.

Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach the claimed invention including: adjacent first and second extending portions on the side surface of the ferrite facing each other with a dielectric part disposed therebetween forming a capacitor (Claim 1), or a first terminal portion which extends from one end of the corresponding first extended portion and which is disposed on the bottom surface of the ferrite and a second terminal portion which extends from one end of the corresponding second extended portion and which is disposed on the bottom surface of the ferrite (Claim 9).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
